Changing the world through better management

Masterclass

The Masterclass provides consultants, senior executives, coaches, researchers, and trainers with the knowledge and skills that allows them to manage, operate, and interpret the data of Diagnostic Mentoring projects. The program certifies Mentors for the work with their clients to develop dynamic capabilities.

Certification as a Mentor is required for the use of the AGILITYINSIGHTS Diagnostic and Toolbox with clients. The certification process consists of the successful application, participation at the **Masterclass Training**, and an introductory project.

Application

The application consists of transmitting the application form from our website, self-registration for the **PRIORITY HUB** with a completed personal profile, and a conversation with two experienced certified Mentors. With the successful application, you will get access to the **MASTERCLASS HUB** with resources, research publications, and the self-study guide.

Training and Certification

In this training, participants will learn from experienced certified Mentors about how to manage, operate, and interpret the data of Diagnostic projects. The learning combines workshops, group work, case studies, individual study, readings, and homework. Participants will receive slide presentations and documentation that they can use to manage their projects. With the completion of the Masterclass training, participants will get access to the **MENTORING HUB** with tools, insights, and guides to support your mentoring and join the events of the global Mentoring community.

Introductory Project

Included in the certification program fee is the **MY FLOW SCAN** diagnostic to gain a first initial experience with the Diagnostic and the Systems Approach. Furthermore, candidates receive a discount on a first client project that can be used for discussion in the Masterclass. This offers the opportunity to gain hands-on experience in managing client projects. Each participant will be coached by an experienced Mentor for the first client project.

The AGILITYINSIGHTS mission is to partner with engaged experts that help executives, teams, and organisations make the shift to dynamic capabilities through application of the Diagnostic and Toolbox.

Top-of-the-World Diagnostic Mentoring Solutions

Today's business world is uncertain and complex. For personal peak performance and superior business outcomes, people need a working environment that is free from interfering viruses, where they can fully unlock their talents, and address higher challenges.

We help people and organisations perform at their peak when challenges rise.

Certified Mentors work with our Systems Approach to help you and your team develop people-centric, agile, and dynamic capabilities for peak performance in your organisation: Digital, data-driven, fast.

Our Systems Approach combines the Diagnostic Toolbox with our Leadership Model and Visual Design Thinking. Find out how this works with the **free AGILE SCAN**: <https://agilityinsights.net/free-agile-scan>

Results

- Diagnostic data for deep insights
- High awareness, shared understanding
- Identified issues and action plan
- Mentoring for fast learning

Outcomes

- Ability to compete in VUCA contexts
- People-centric, agile, and dynamic capabilities
- Higher speed, agility, and resilience
- Superior performance, innovation and growth

How people-centric, agile, and dynamic is your organisation? What can you do?

Four solutions offer answers:

«Peak performance» | personal diagnostic and mentoring

Certified Mentors help you identify your potential and assess the interferences that keep you from performing at your best and reach flow more often, be it as a leader, a professional, at work, with sports or the arts.

«Identify what it takes» | For leaders and experts

Certified Mentors help you, your team, and your organisation to make the shift to agile and people-centric by exploring current capabilities, creating a roadmap that works for you and providing development guidance that remove interferences and ensure you reach top maturity and performance levels.

«Get ready for the shift» | For leadership and work teams

Certified Mentors help you and your team to get ready for new challenges by measuring your organisation's agile maturity for clarity on the baseline, by supporting your decision on the desired maturity target, and by distilling the key issues to exploit the people-centric potential.

«Crossing the Rubicon» | For entire institutions

Certified Mentors help you, your team, and your organisation to make the shift to agile and people-centric by exploring current capabilities, creating a roadmap that works for you and providing development guidance that remove interferences and ensure you reach top maturity and performance levels.
