Changing the world through better management

Supervision

The Supervision Training provides participants with the knowledge and skills that allows them to administer the company's internal Diagnostic process and the use of the Toolbox. The program benefits internal experts and certifies them as Supervisors for their work with their own organisation.

Certification as a Supervisor unlocks the Diagnostic and Toolbox for internal and external use. The certification process consists of the successful application, the **Supervision Training**, and the introductory project.

Application

The application consists of booking your Supervisor Certification through our shop and the self-registration for the **PRIORITY HUB** on the AGILITYINSIGHTS.NET website with a completed personal profile. With the successful application, you will get access to the **SUPERVISION HUB** with resources, directories, tools, research, and guides to support your work.

Training

In this training, participants will learn from our experts about how to administer a Diagnostic project and how to use the Toolbox. The learning combines workshops, group work, case studies, individual study, readings, and homework. Participants will receive slide presentations and documentation that they can use to supervise their own projects.

Project

Included in the certification and training fee is the personal **MY FLOW SCAN** Diagnostic for the participant. Together with the results from the company's project, this offers a fast introduction into the Systems Approach. Participants gain hands-on experience in supervising their organisation's project. Each participant will be coached by an experienced Mentor for their introductory project.

The AGILITYINSIGHTS mission is to partner with engaged Supervisors that support their organisations in making the shift to dynamic capabilities through application of the Diagnostic and Toolbox.

Top-of-the-World Diagnostic Mentoring Solutions

Today's business world is uncertain and complex. For personal peak performance and superior business outcomes, people need a working environment that is free from interfering viruses, where they can fully unlock their talents, and address higher challenges.

We help people and organisations perform at their peak when challenges rise.

Certified Mentors work with our Systems Approach to help you and your team develop people-centric, agile, and dynamic capabilities for peak performance in your organisation: Digital, data-driven, fast.

Our Systems Approach combines the Diagnostic Toolbox with our Leadership Model and Visual Design Thinking. Find out how this works with the **free AGILE SCAN**: <https://agilityinsights.net/free-agile-scan>

Results

- Diagnostic data for deep insights
- High awareness, shared understanding
- Identified issues and action plan
- Mentoring for fast learning

Outcomes

- Ability to compete in VUCA contexts
- People-centric, agile, and dynamic capabilities
- Higher speed, agility, and resilience
- Superior performance, innovation and growth

How people-centric, agile, and dynamic is your organisation? What can you do?

Four solutions offer answers:

«Peak performance» | personal diagnostic and mentoring

Certified Mentors help you identify your potential and assess the interferences that keep you from performing at your best and reach flow more often, be it as a leader, a professional, at work, with sports or the arts.

«Identify what it takes» | For leaders and experts

Certified Mentors help you, your team, and your organisation to make the shift to agile and people-centric by exploring current capabilities, creating a roadmap that works for you and providing development guidance that remove interferences and ensure you reach top maturity and performance levels.

«Get ready for the shift» | For leadership and work teams

Certified Mentors help you and your team to get ready for new challenges by measuring your organisation's agile maturity for clarity on the baseline, by supporting your decision on the desired maturity target, and by distilling the key issues to exploit the people-centric potential.

«Crossing the Rubicon» | For entire institutions

Certified Mentors help you, your team, and your organisation to make the shift to agile and people-centric by exploring current capabilities, creating a roadmap that works for you and providing development guidance that remove interferences and ensure you reach top maturity and performance levels.
